DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1/10/06 has been entered.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

SUBSTITUTE TITLE:

Transflective liquid crystal display device having groove in buffer layer and fabricating method thereof

Allowable Subject Matter

Claims 1-24 are allowed.

The following is an examiner's statement of reasons for allowance:

Arguments and amendment filed on 1/10/06 are persuasive to overcome the prior art rejections. Specifically, arguments are persuasive in identifying that the prior art fails to disclose or suggest the buffer layer as having a groove corresponding to and over the black matrix.

Japanese Patent Application Publication Number 2000-298271 discloses a groove in a buffer layer and a color filter formed on top. The prior art, however, does not suggest forming a common electrode on the color filter layer as required by the claims.

Japanese Patent Application Publication Number 2000-062525 discloses a black matrix, buffer layer, and color filter, but fails to disclose the buffer layer as having a groove corresponding to and over the black matrix and a common electrode over the color filter. The prior art does not suggest the missing claimed limitations.

U.S. Patent Application Publication No. 2002/0101552 discloses a black matrix, a buffer layer having a groove, and a color filter, but fails to disclose the proposed placement of the groove. The prior art fails to suggest placement of the groove of the buffer layer corresponding to and over the black matrix.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
